

You will never need to give us your passwords. Instead you “invite” us in — like adding a name to a guest list. You stay in full control and can remove us anytime with one click. This is the safe way, and it’s how it should be done.

Wherever a step below asks for a name or email to invite, use:

greg@gnldigitalgroup.com

Do these one at a time. Stuck on any of them? Stop and call us at 704-594-5826 — we’ll do it together on the phone. You only need to do the sections that apply to you.

1. Your Domain Name

“The company that owns your website address.” Do this if your domain is at GoDaddy.

- 1 Open your web browser (Chrome, Edge, or Safari).
- 2 Click the address bar at the top, type this exactly, and press Enter:

godaddy.com/access
- 3 If asked, sign in with YOUR GoDaddy username and password. (We never see it.)
- 4 Find the section “People who can access my account.”
- 5 Click Invite to Access.
- 6 Enter our Name (Greg Blair) and Email (greg@gnldigitalgroup.com).
- 7 Choose the access level that includes “Products & Domains” (or the highest option shown).
- 8 Click Invite. That’s it — we’ll accept on our end.

The invitation expires in about 2 days. Text or email us once you’ve sent it and we’ll accept it right away.

2. Your Google Business Listing

“The box on Google with your hours, phone, and reviews.”

- 1 Open your web browser and go to google.com.
- 2 In the Google search box, type your business name exactly.
- 3 Your business should appear at the top with options like Edit profile, Reviews, Messages. (If you don’t see those, you’re not signed in to the right Google account — call us.)
- 4 Click the three-dot “More” menu (looks like ■ or “⋮”).
- 5 Click Business Profile settings.
- 6 Click People and access.
- 7 Click the blue Add button (top right).
- 8 Type our email: greg@gnldigitalgroup.com
- 9 For the role, choose Manager, then click Invite.

You stay the Owner — we’re only a Manager, which means we can manage your reviews, photos, hours and posts, but we can’t remove you or delete anything.

3. Your Business Email (Microsoft 365)

Only if we’re managing your email / Outlook. This one is easiest to do together.

Your email is the most sensitive thing you have, so rather than risk a wrong click, we’d rather walk you through this live:

- 1 Call us at 704-594-5826 when you’re ready.

How to Give Us Access

A simple, step-by-step guide — no tech knowledge needed.

GNL Digital Group
704-594-5826
gnldigitalgroup.com

- 2 Have your Microsoft 365 sign-in handy (you type it, never us).
- 3 We'll guide you through adding Greg as an administrator, step by step, while you stay in control of your own login.

If a Password Ever Truly Has To Be Shared

For almost everything you'll never share a password. But once in a while an older account has no "invite" feature. If that happens:

- 1 Do NOT email or text us the password, and do NOT write it on the intake form.
- 2 Call us at 704-594-5826 and we'll set up a safe, encrypted way to send it that erases itself after we use it.

This protects you, your customers, and your business.

Send us a quick note when each one's done and we'll confirm we're in. Stuck anywhere? Don't guess — call 704-594-5826.
